# SITUATION SUMMARY

## CDPH Ebola Situational Update

The risk of Ebola importation into California is very low.

The California Department of Public Health (CDPH) will be actively working with the healthcare community and local health departments in protecting the people of the state from possible Ebola importations.

The key CDPH objective for Ebola prevention is early identification of potential cases and avoiding spread of the disease.

CDPH will shortly be distributing information to local health departments and health care providers in California that will help them manage recent travelers to the region. CDC infection control guidelines which were released today by CDC will be included.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA:**

A dry southwesterly flow will prevail throughout the northern California area today. The strongest winds will be east of the Cascade-Sierra crest this afternoon, with gusts reaching 25-30 mph. A weak disturbance in the flow will produce isolated thunderstorms over Southern Oregon, and there is a slight chance of some activity spilling into far northern California. The next wave of monsoon moisture will move northward into the northern California area on Sunday. Showers and wet thunderstorms will reach the Lake Tahoe region by late Sunday afternoon or evening, and continue spreading northward overnight and over much of the higher terrain of the northern California area on Monday. Dry strikes and new ignitions are possible with this activity. Lingering showers and thunderstorms will continue in northern and eastern areas Tuesday. A weak cold front will move from north to south over the northern California region late Tuesday and Wednesday with isolated showers and thunderstorms. Thursday will be dry, but late in the day a low pressure trough approaching from offshore will produce increasing onshore flow, westerly winds, and cumulus buildups over the northern coastal mountains. By Friday mild and breezy conditions will prevail in all areas, and thunderstorms are once again possible over the higher terrain.

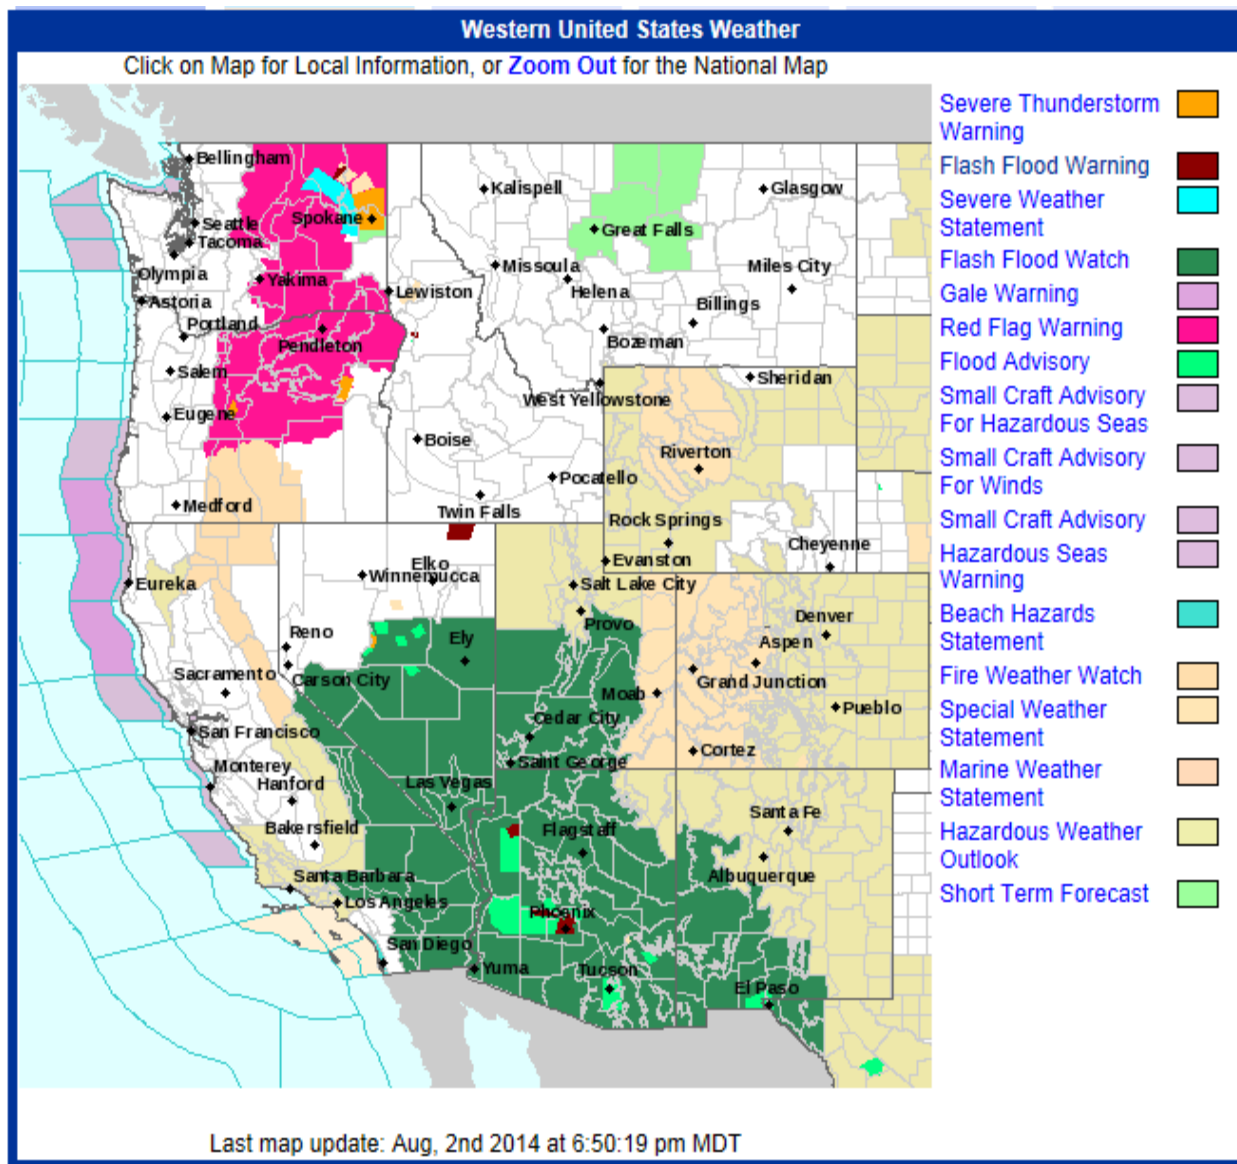

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **SOUTHERN CALIFORNIA:**

A disturbance currently off the Central Baja Coast will move northward over southern California tonight and over the Sierra Sunday. This disturbance will bring widespread showers and thunderstorms to southern California, including the coastal and valley areas, through this weekend and to the Sierra on Sunday. Temperatures will remain hot over central California today due to abundant sunshine, but cloud cover from the disturbance will cool temperatures to near normal over southern California. Temperatures will be 5 to 10 degrees below normal Sunday as cloud cover moves across the entire region. Minimum humidity will be mainly between 20% and 40% by Sunday. A weak area of low pressure will form off the central California Coast on Monday bringing isolated to scattered afternoon showers and thunderstorms to the Sierra through the end of next week. The thunderstorm threat will end across southern California Monday, except there may still be isolated thunderstorms over the deserts bordering Nevada and Arizona. Temperatures will be around 5 degrees below normal Monday through the end of next week. Minimum humidity will drop to 12% to 25% above and inland from the marine layer, which will be around 2,000 feet deep. There will be gusty downdraft winds in and near thunderstorms, otherwise winds will be light through the end of next week.

- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

## **Situational Summary**

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- On 7/15/14 the State Water Resources Control Board passed a new emergency regulation to reduce outdoor urban water use. The regulation makes an exception for health and safety circumstances. Local agencies can ask courts to fine water users up to \$500.00 a day and the SWRCB can fine water agencies up to \$10,000.00 per day. The adopted regulations are expected to go into effect by August 1, 2014 and remain in effect for 270 days.

- Current Reservoir Levels continue to decline. Pine Flat had a 5% decrease from last week. Levels as of July 30: Don Pedro 44%; Exchequer 21%; Folsom Lake 42%; Lake Oroville 36%; Millerton Lake 53%; New Melones 26%; Pine Flat 14%; San Luis 23%; Lake Shasta 35%; Trinity Lake 36%; Pyramid Lake 93%; and Castaic Lake 47%.

### Situational Summary

- **Drought Top Environmental Concern of Californians, PPIC Report Finds:** A newly released survey by the Public Policy Institute of California (PPIC) reveals that drought and wildfires are at the top of the list of public worries about the impacts of global warming. The survey also found that 75% of respondents believe public water agencies should require residents to reduce water use.

- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
- The DWR has released a list of unmonitored high and medium priority groundwater basins. As outlined in California's Water Code, some counties and groundwater management agencies in unmonitored basins may be ineligible for water grants and loans administered by the state.
